Quick Facts

- AT&T serves 87 million wireless customers.
- We were the first wireless provider in the world to offer Apple's iPhone — the first and only wireless provider to offer a wireless device with iTunes.
- AT&T has more than 47 million consumer revenue connections and is the leading U.S. provider of traditional wireline voice services.
- 2.3 million customers subscribe to AT&T U-verseSM TV, the only 100-percent IPTV service from a national service provider.
- We have more than 17.5 million high speed Internet subscribers as of 1Q10, serving more customers than any other U.S. broadband provider.
- We provide Wi-Fi access at more than 20,000 U.S. hot spots and more than 125,000 locations in countries around the world (including both company-owned and third-party roaming locations) — with access to approximately 7,000 Starbucks locations.
